□ □ □ INNOVATIVE CONCEPTS & SCENARIOS

**CoopAIR\*:** a valuable insight of Latin America countries for Aeronautics

**March 2011**

**J-Paul DOMERGUE**

**Head of Operations**

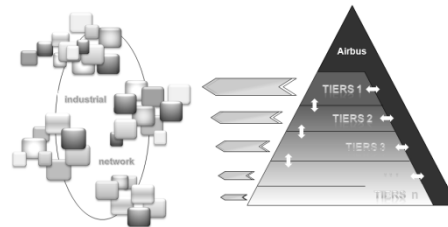

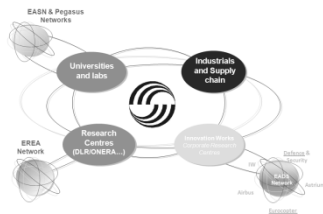

*\* project carried out by Airbus*

**EADS**

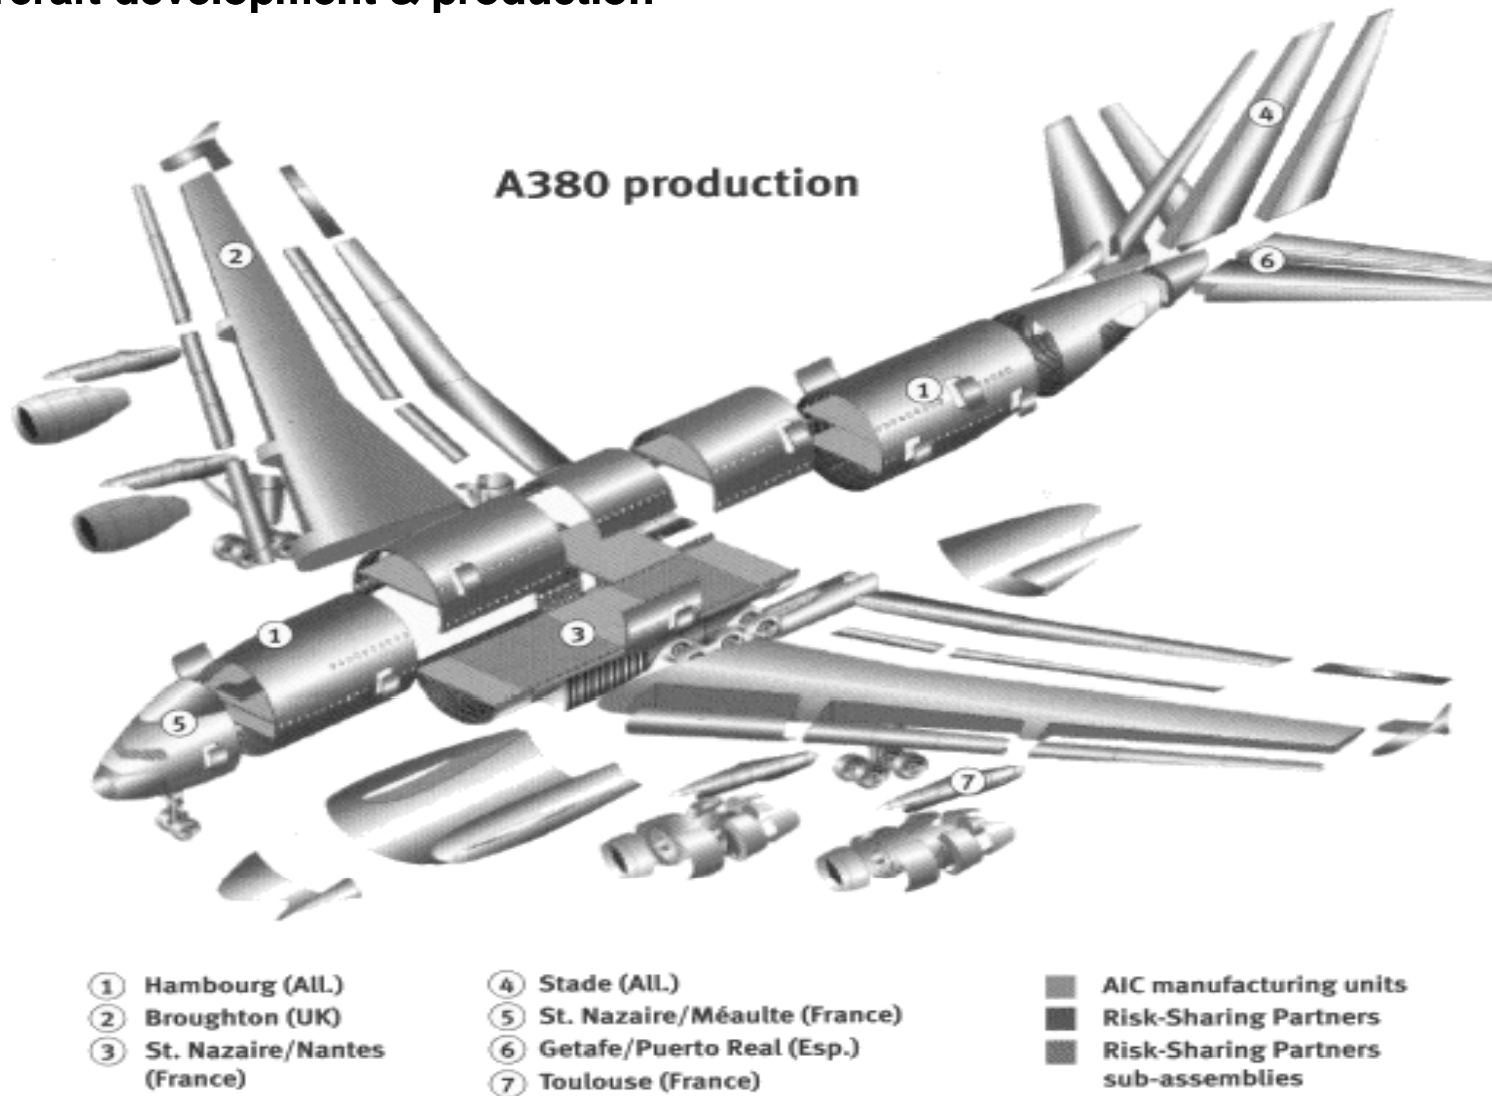

## CoopAIR: a valuable insight of Latin America countries for Aeronautics

# Airbus models and principles for Research & Technology and Aircraft development & production

# CoopAIR: a valuable insight of Latin America countries for Aeronautics

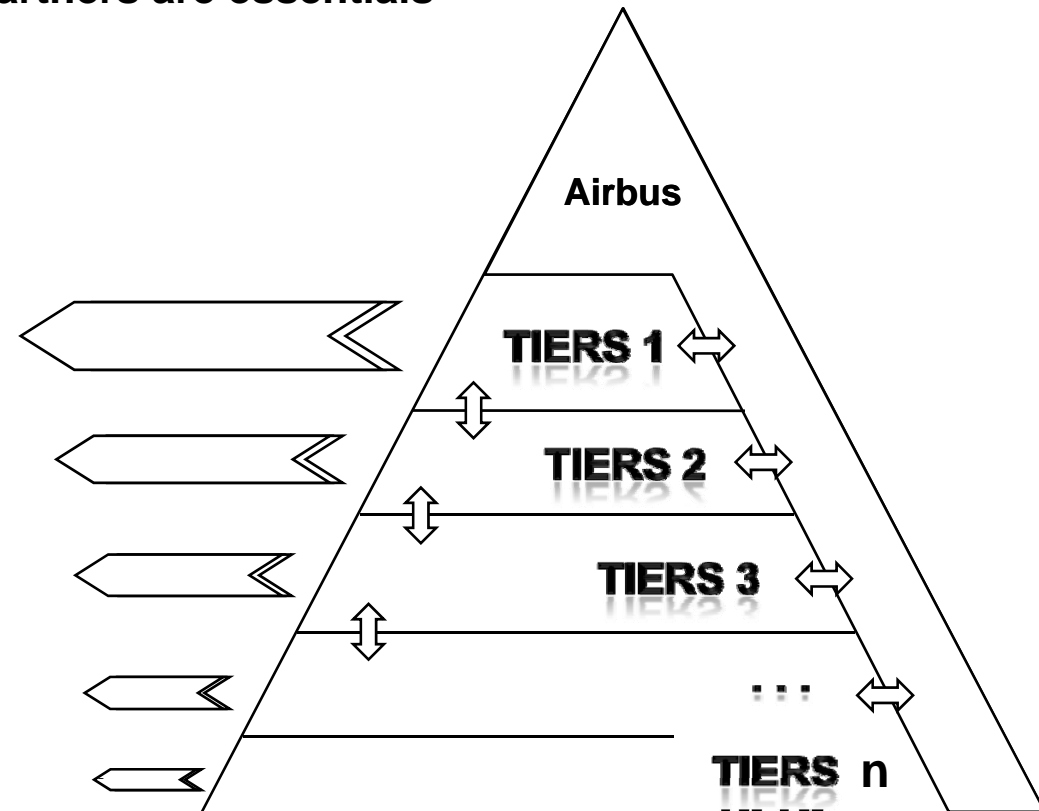

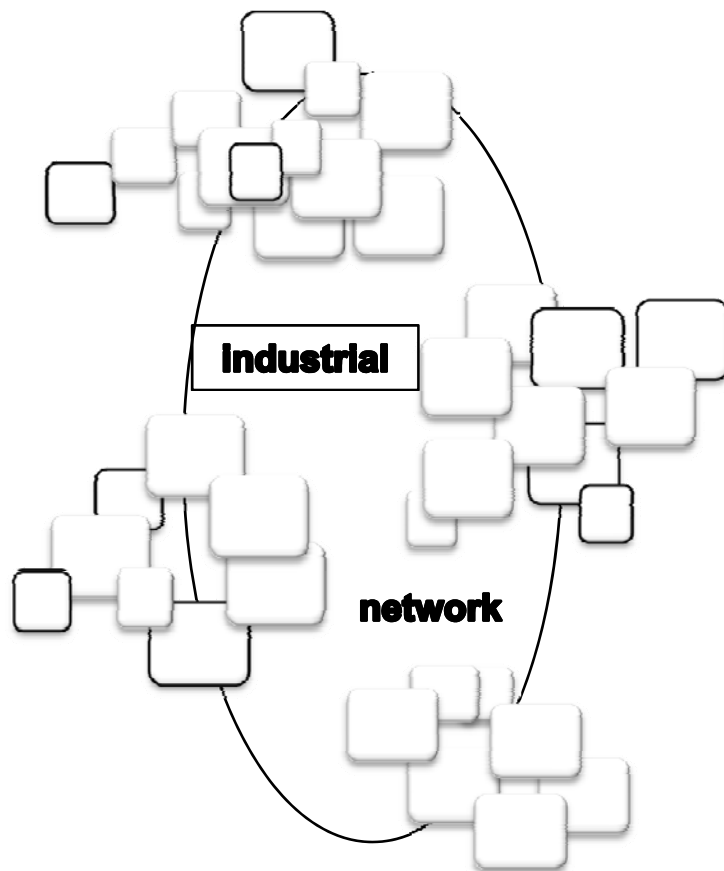

## Airbus aircraft development & production

# CoopAIR: a valuable insight of Latin America countries for Aeronautics

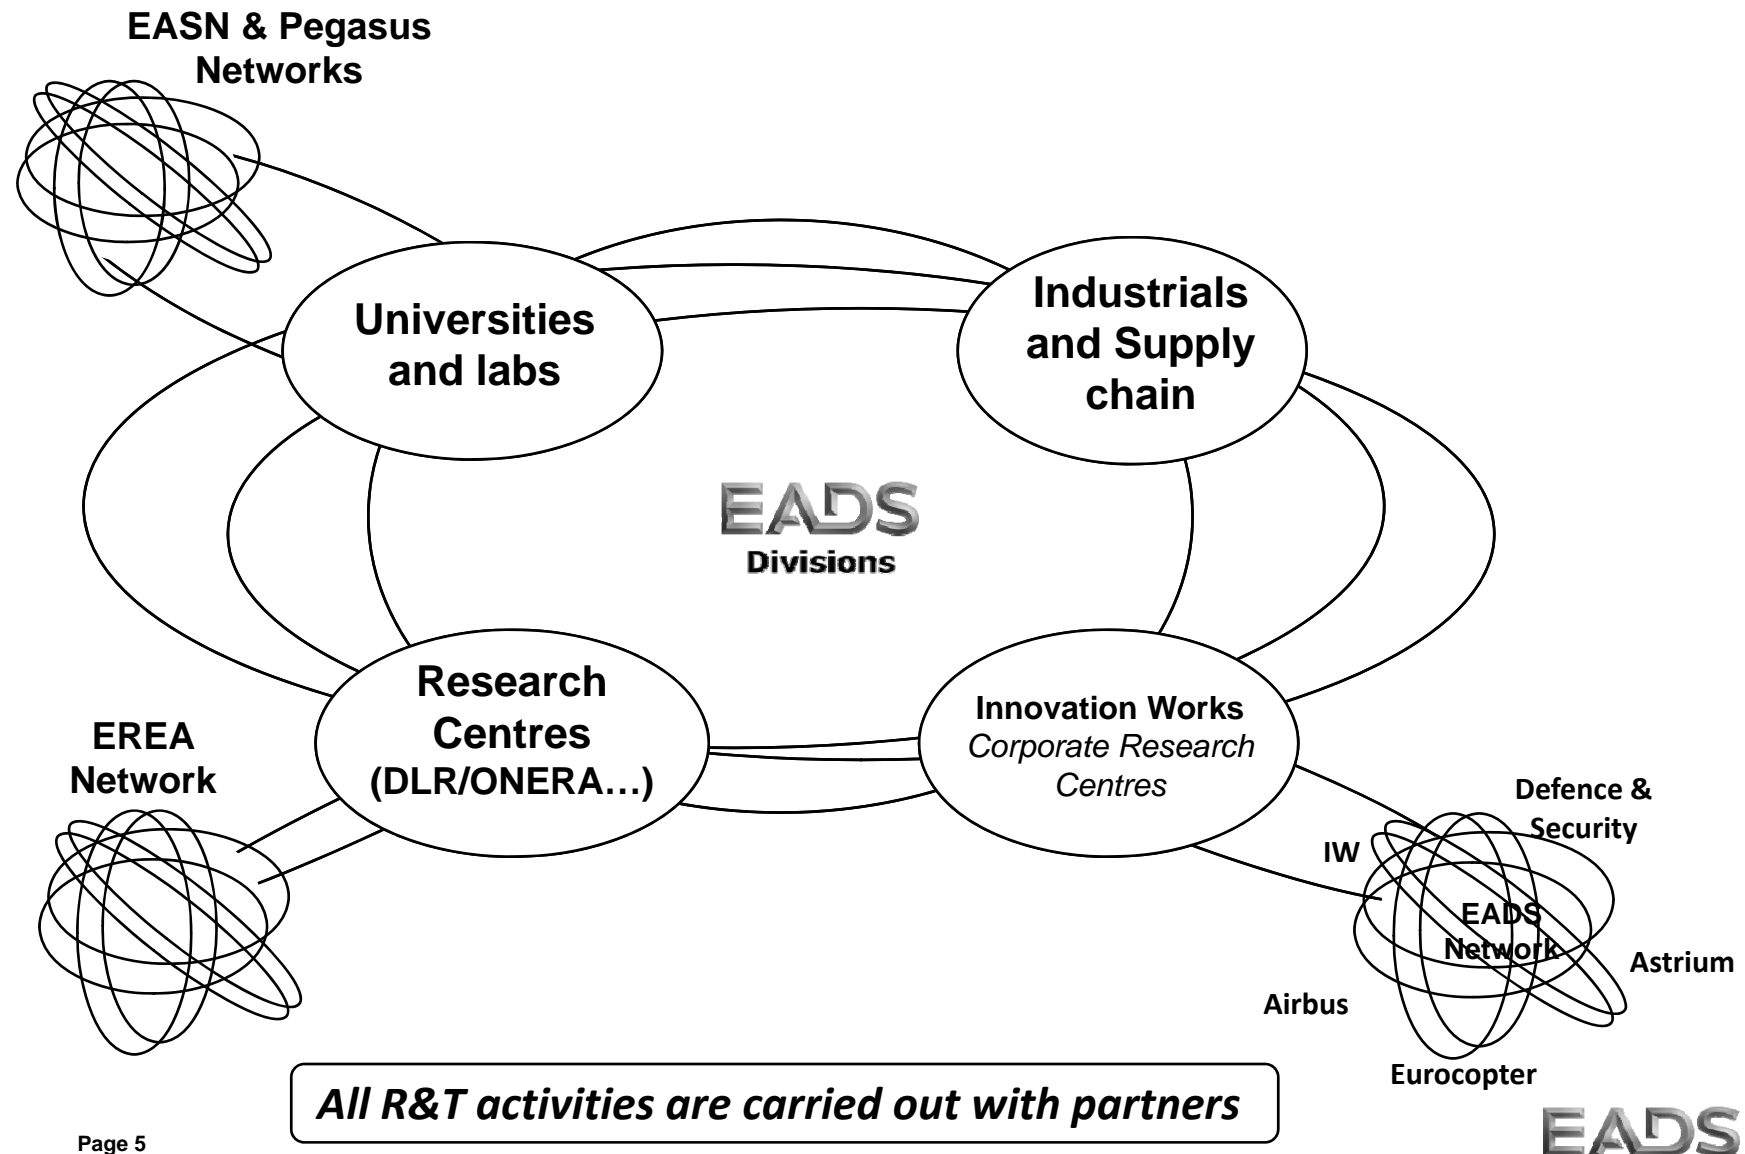

## Airbus aircraft development & production

- Airbus relies on Suppliers to support its Aircraft development
- Relations with Tiers are mandatory
- Partners of partners are essentials

# CoopAIR: a valuable insight of Latin America countries for Aeronautics

*Research & Technology: partnership principle*

# Airbus international R&T partnerships

## *CoopAIR opportunity in Latin America countries*

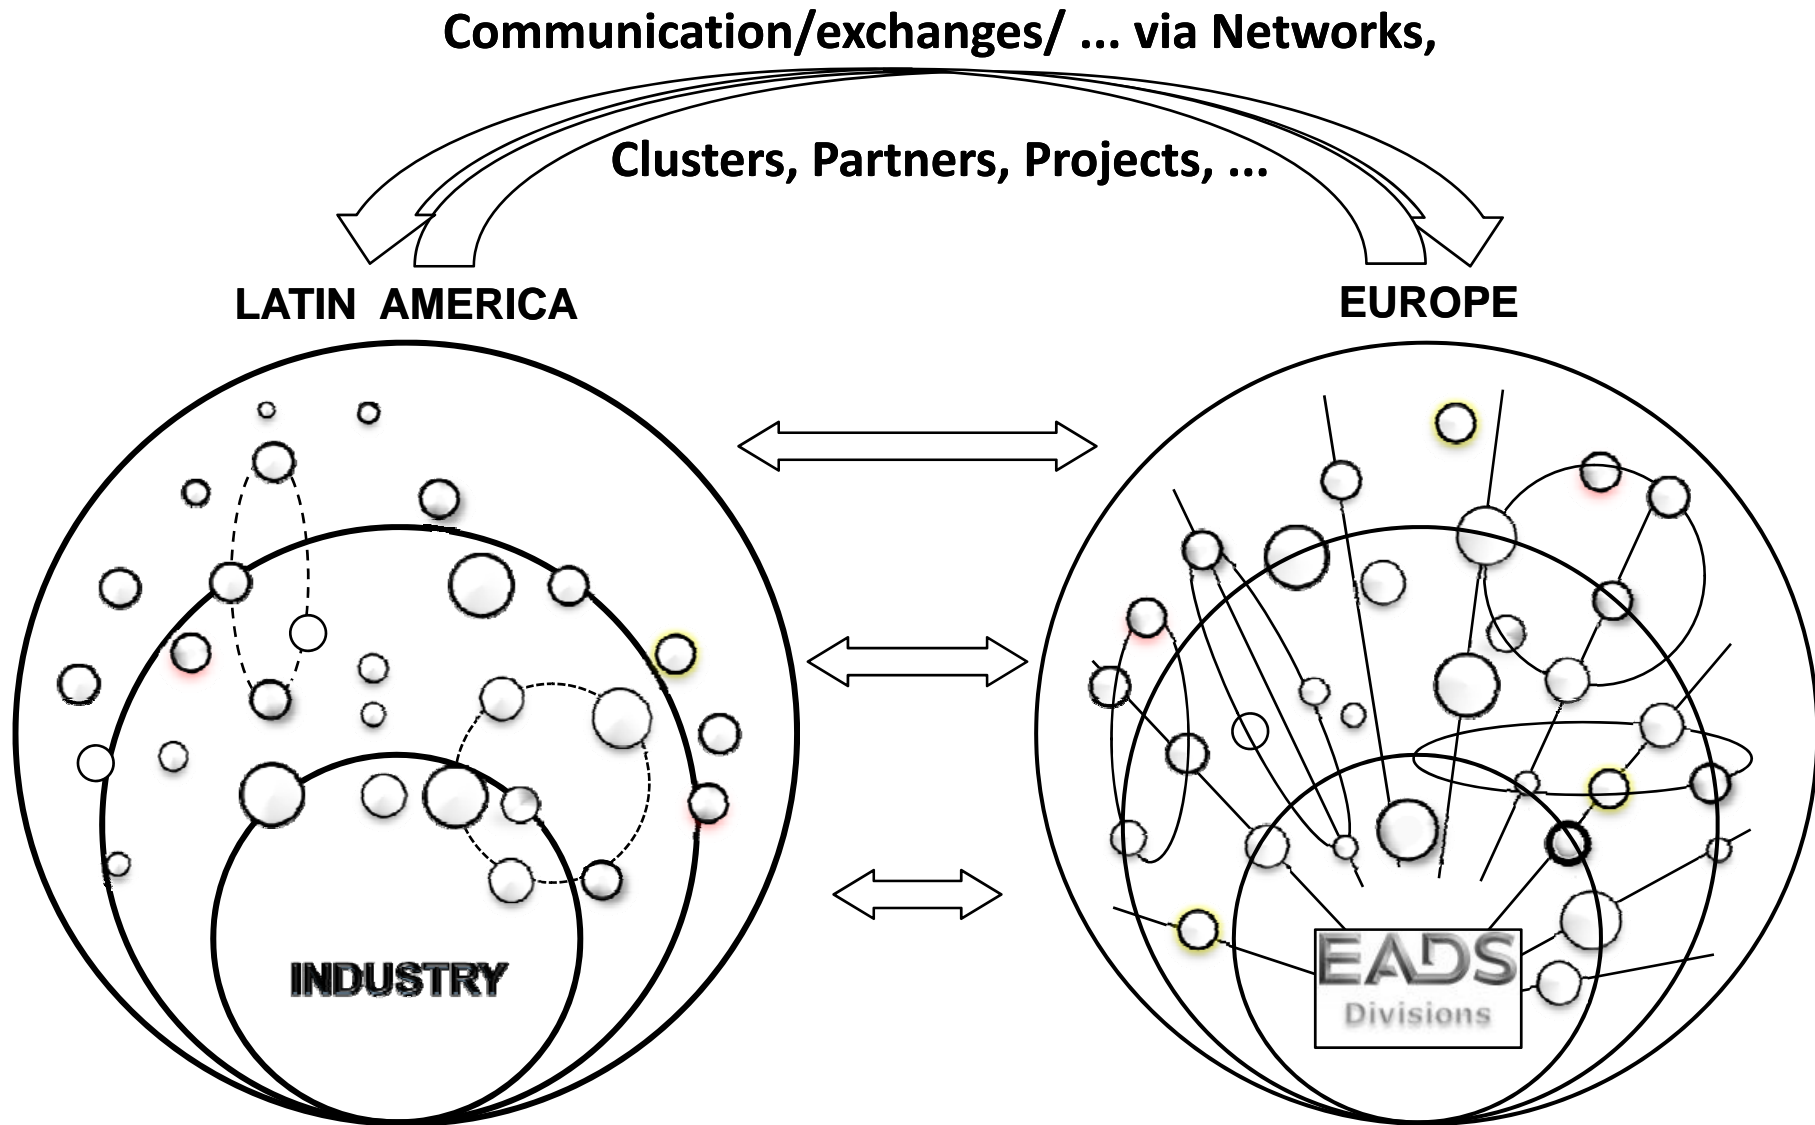

## CoopAIR: a valuable insight of Latin America countries for Aeronautics

**So now**

**What's next ?**

## CoopAIR: a valuable insight of Latin America countries for Aeronautics

## **CoopAIR: a valuable insight of Latin America countries for Aeronautics**

### **Conclusion**

- CoopAIR was an excellent initiative and has valuable deliverables**
- Latin America countries have globally good skills; they would be usable for aeronautics in the next future**
- People encountered have shown a very strong cooperation mindset**
- Relations can occur via partners of the main industrial companies through cooperative projects**
