

AirTN Air Transport Net - Next Generation

'One of the key enablers for the prosperous development of Aeronautics in Europe'

Overview

Aeronautics is one of the biggest and important industries in the EU, not only for its pivotal role in the transport of people and goods but for the European manufacturing industries as well. To expand its aeronautics industry Europe needs to have a strong policy on research and development, putting this into action by carrying out top quality state of the art research and innovation activities in all areas of the aeronautics industry including infrastructure, development, passenger care and supply chain operators.

AirTN therefore creates opportunities for collaboration in order to establish aeronautical RTD that would not have otherwise been undertaken independently, due to financial or technical constraints.

Objectives

- Strengthen and widen the aeronautical network established between national/ regional organisations, Governmental institutions and EU Member States & Association States.
- Organise Coordinated Calls to fund transnational research projects.
- Stimulate co-operation of national funded research in support of technology initiatives on European scale such as Horizon 2020, Clean Sky, SESAR, etc.

Key Facts

- **Acronym:** AirTN-NextGen
- **Duration:** 30 Months
- **FP7-AAT-2013-RTD-1**
- A network of Member States and Associated Countries
- **www.airtn.eu** for more

- Enhance transnational co-operation for research infrastructure.
- Stimulate transnational co-operation in education and workforce mobility.

AirTN Highlights

AirTN Next Gen's predecessors have successfully established and maintained an extensive network of European aeronautics stakeholder groups, most notable highlights include:

- Consolidation of the AirTN Network.
- A European Research Infrastructure catalogue was created collecting information for 182 facilities from 10 countries in support of ACARE WG5 and will be further supported.
- Creation of a calendar of national/ regional calls and programmes in Europe relevant to aviation.
- 2 Successfully coordinated Calls.
- Thematic workshops have been organised on different topics e.g. Education, aviation safety, greening and alternative fuels.
